DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 22-25, 78-100, drawn to a compound, classified in class 536, subclass 4.1.
- II. Claims 14-21, 26-33, drawn to a compound, classified in class 536, subclass 4.1.
- III. Claims 34-41, drawn to a compound IV, classified in class 536, subclass 4.1.
- IV. Claims 42-49, drawn to a compound V, classified in class 536, subclass 4.1.
- V. Claims 50-57, drawn to a compound VI, classified in class 536, subclass 4.1.
- VI. Claims 58-62, drawn to a compound VII, classified in class 536, subclass 4.1.
- VII. Claims 63-67, drawn to a compound VIII, classified in class 536, subclass 4.1.
- VIII. Claims 68-77, drawn to a compound IX and X, classified in class 536, subclass 4.1.
- IX. Claims 101-114, drawn to a method for sequencing, classified in class 435, subclass 91.1.

Art Unit: 1637

- X. Claims 115-116, drawn to a method for preparing polynucleotide, classified in class 435, subclasses 6 and 91.1.
- XI. Claim 117, drawn to a method of preparing dye labeled RNA, classified in class 435, subclass 91.1.
- XII. Claims 118-123, drawn to a method for detecting 5-methylcytosine, classified in class 435, subclass 91.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VIII and IX-XII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the compounds can be used for any of the inventions of IX-XII. Or they can be used for any probes for hybridization assay or in methods of inhibition as substrate analogs or alternatively as in-vivo enzymatic inhibitors of which many mononucleotides are well known.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Applicants have to do a species election for L moiety for group I; L1 and L2 for Group II; M for group III-V.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1637

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
